Quik Pro Systems

Quik Pro Return for Repairs / Refurbish

Quik Pro Buzzer Systems are built to last. Our Warranty provides ninety days labor, one year on parts, and two years on the internal circuitry. If you have any concerns or questions about repairs (Don't know what part you need) or shipping, please call our service department at 800-284-6377. They are available to assist you with any Quik Pro issues you may have. Many times they can diagnosis problems and fix over the phone or advise what you need to order to get your unit going again.

REPAIR / REFURBISH / UPGRADE PROGRAM

We offer a program to refurbish your old Quik Pro to make it like new. We **can only refurbish items that are sent to us**. If you require lost or missing parts, you can request they be added to the order. The refurbish program allows us to check connections and circuits, repair/replace bulbs, polish and repair the light globes you send in, new globes for the lights can be added at additional charge. During your Repair/Refurbish/Upgrade, you may be offered one-time special prices on items you may need like missing lights, etc. This will only be offered while we are performing this service. You cannot come back later and get these deals.

We understand schools, budgets, and funding. We have not raised prices for over 30 years. We understand. We do everything we can to help your money go further.

DO I NEED A REPAIR, REFURBISH, OR UPGRADE?

If the Console (Brains) of your Quik Pro has ports to plug lights into the back, it will need a refurbish.

If the Console has a large brown/black plug on back to plug all the cables into one slot, you need an Upgrade.

The Upgrade program modernizes your Quik Pro. You get new modular ports on the back of the console, new modular cables, and new plug-in external power supply. These changes make it easier to replace cables or power supply without having to send your unit in to the factory. Separately these changes and new parts could cost \$250 or more, but this is all covered in the low Upgrade price of \$175. Amazing, Right!

If you just need a lower cost repair or replaced part, the plant can advise you.

TO GET YOUR UNIT REPAIRED, REFURBISHED, or UPGRADED, PLEASE FOLLOW THE INSTRUCTIONS BELOW:

Send your unit to our **FACTORY**. We prefer UPS. The shipping and cost to send the unit to our FACTORY is your responsibility. WE ARE NOT RESPONSIBLE FOR UNITS LOST OR DAMAGED IN TRANSIT. (That what insurance is for. UPS rarely loses a unit, but things happen. Insurance or not, is your call.) Units sent to the factory require an order to be placed with our SALES OFFICE. Not placing the order first can delay your service.

[Additional charges may apply: \$25 administrative or forwarding fee will be charged for all units that are sent in without order being placed prior to sending unit to plant or unit shipped to SALES OFFICE]

DO NOT SHIP TO THE SALES OFFICE IN GEORGIA. SHIP TO THE AL ADDRESS ONLY!

Revised 2-2020 (This form supersedes all other forms)
